*NB: If you are unsure, please check with your G.P or Specialist*

- During the 30 minutes the foot spa will begin to rebalance the positive and negative ions in your body. It is important to drink at least 500ml of water during treatment.
- You will notice the water will change colour through treatment; this is perfectly normal. You may also see deposits floating on top of the water. Again, this is normal as one of the benefits of a foot spa treatment is Lymphatic drainage.
- Ideally two sessions are recommended per week. There must be at least 48 hours between treatments.
- After use, please make up nutrition absorption such as vitamin, mineral, fatty acid and ect to promote the body metabolism and eject the toxin by itself.
